

What is a Favicon?

A *favicon* (short for "favorites icon" and also known as a page icon), is an icon associated with a particular website or webpage that is displayed in the browser address bar next to a site's URL.

Step 1 - Create a graphic image exactly 100 Pixels by 100 Pixels.

Step 2 – go to a FavIcon generator to create a .ico file.

<http://www.favicongenerator.com/>

Step 3 – Place the Favicon in your images folder and place the following code in your head tag.

```
<head>  
<link rel="shortcut icon" href="images/favicon.ico" >  
</head>
```

Shortcut icon – Is the identifier name needed.

Favicon.ico – is the name of the icon to be used.
